Integrity Grading and Excavating, Inc. now offers **Hydro Excavating** for those tough excavating projects. Getting your job done safely is our goal. Our team members are experienced in hydro excavating and are Operator Qualified. Integrity Grading and Excavating, Inc. is an ISNetworld Contractor, meeting strict safety standards.

Hydro Excavation is a non-mechanical, non-destructive process that uses pressurized water and industrial strength vacuum to simultaneously excavate and evacuate soil. As **hydro excavation** safely breaks up soil, the soil and water slurry is conveyed by vacuum to a debris tank. Hydro excavating has minimal disruptions, with accuracy of excavation.
